

Organizational Structure

Washington Comprehensive Cancer Control Partnership As of May 2004

*** Note:** Colorectal cancer and prostate cancer are current WCCCP priorities. The **Colorectal Cancer Task Force** and **Prostate Cancer Task Force** are existing work groups implementing WSCCC Plan strategies. Both Task Forces are funded through CDC grants to the Washington State Department of Health Comprehensive Cancer Control Program. Please refer to the Task Forces tab in this handbook for more information.

Plan Implementation Committees will form other work groups as necessary to address additional WCCCP priorities as they are established. The number of work groups will vary based on the number of plan goals prioritized.
